# DENNIS MONDRAGON

GRAPHIC & INTERACTIVE DESIGN

## STATEMENT

I have recently completed my Bachelors of Fine Arts degree at California State University of Fullerton. My concentration in Graphic Design. Upon graduating I realized to succeed in this field that designers must eat, breathe, and sleep graphic design. I truly live for the work. Graphic design is what I am great at and also the very thing that I strive to be better at. For almost a year now, I have been employed by Pacific Sothebys Realty. I have been very blessed to work there. Learning design software and the ways of print and social based production are just a couple of the important details of the industry that I have learned. This experience has given me the knowledge, skill, and confidence I needed to continue my journey into my design career.
